

Clean Flat Tops - CFT for C70 Cards

Additional Flat Cleaning system

- ✓ *Enhanced Flat tops Life*
- ✓ *Better Sliver Quality Consistency*
- ✓ *Saving of Compressed Air in Cleaning the Foundation of the Tops.*
- ✓ *Saving of Man Power in Cleaning the foundation of tops.*
- ✓ *Continuous Cleaning of Flat tops foundation*

Flat Cleaning System

Some of the Cards are having flat cleaning arrangement which can not touch the foundation of the flat tops. So micro dust and synthetic dirt gets deposited over the tops foundation.

Problem of foundation Loading

- * Poor Carding due to the fibre entry restriction.
- * The flat tops foundation hole gets filled with this micro dust which interacts with moisture and weakens the needle.
- * Since the hole is blocked by the micro dust, the 'to and fro' motion of flat top's needle is arrested.
- * It results in poor carding and poor flat tops life.

Clean Flat tops - CFT for C70 Cards

Mills Practice.

- Mill engages a skilled man power to clean the flat tops every day depending upon the material processed.
- Mills use brush and compressed air to clean the flat tops.
- Manual effort will not be consistent for every machine.
- Once the cleaning is done, the micro dust starts to get deposited over the foundation, Immediately.

MASPRIC's CFT

Additional Clean flat system is having brush and fillet wound spirally over a wooden roll.

The Tampico brush penetrates upto foundation and clean it 24/7 hours.

Why Maspric's CFT is preferred?.

- ❖ Maspric uses High quality seasoned wood and Imported Tampico bristles & CNC crafted Wheels and Pulleys.
- ❖ MASPRIC's is a trusted name with many customers for completing the project to customer's satisfaction..
